The largest and most complete portfolio for female Stress Urinary Incontinence
Desara® product portfolio offers unparalleled versatility, giving surgeons the freedom to choose their approach between Transvaginal, Suprapubic, Transobturator Outside-In and Inside-Out, and Single Incision slings.
Engineered to lay flat under the urethra¹
Excellent mesh integrity with all Caldera Medical’s slings
Tapered tip designed to facilitate smooth tissue passage¹

5 other slings

Universal connection¹

Environmentally friendly surgical grade stainless steel

Reduce packaging waste by up to 94%¹

Desara® Large Pore Size Mesh (≥1,000µm)¹

Robust and stable

Mesh does not fray or curl, offering stable and controlled support¹

Six Types of Reusable Introducers for Standard Mid Urethral Slings**

3.2 mm Inside-Out tip

3.2 mm Outside-In tip

Five other slings

Five Desara®

Universal connection"
Universal Solution for Reusable Instruments

- **Desara® Clear Sling**
- **Desara® Blue**
- **Desara® Blue OV**

**Desara® Blue**

- **Blue Sling**
- **Blue Overlapping Sleeve Sling**

---

**Reduce packaging waste by 94% on average**

**Intuitive connection system compatible with the full suite of Caldera Medical introducers for standard mid urethral slings**

**Can replace up to 25 sling products, reducing the investment in your sling inventory by up to 75%**

**Desara® Blue offers overlapping sleeve option with Desara® Blue OV**
Transvaginal Approach

Desara® TV
CLEAR TRANSVAGINAL SLING

Desara® Blue TV
BLUE TRANSVAGINAL SLING

Compatible with Desara® CAL–TV32 introducer
Blue dilator tube to enable easy visualization during cystoscopy
Sleeve thermally bonded to dilator tube for smooth passage without drag on tissue
Desara Introducer is 197% more stable†† compared to Advantage Fit® and 83% more stable†† compared to TVT Exact®

Transobturator Approach

Desara® SL
TOT SHORT LENGTH SLING

Desara® Blue SL
BLUE TOT SHORT LENGTH SLING

Compatible with all Caldera Medical TOT introducers
Short length sling reduces the amount of mesh implanted (12 cm long vs. the traditional sling length of 45 cm)
Limits the presence of mesh in the adductor muscles
May help reduce immediate post-op groin pain vs. the original inside-out transobturator

Desara® Introducer is 197% more stable†† compared to Advantage Fit® and 83% more stable†† compared to TVT Exact®
Sleeve thermally bonded to dilator tube for smooth passage without drag on tissue

12 cm
**Desara®, Desara® Blue and Desara® Blue OV are not compatible with Desara® One Single Incision Sling introducer.**

**Reusable introducers are not compatible with Desara® One Single Incision Sling.**

***"Stable" defined as the inverse of wire displacement. Data on file at Caldera Medical.***

---

1. Caldera Medical Data on File.

---

**TOT Outside-In and Suprapubic Approach**

**Desara® Blue SS**

- Compatible with Suprapubic and TOT outside-in introducers
- Reduced suture loop for easier tip attachment
- Designed for easier handling in outside-in approaches
- Unique blue mesh design for enhanced visibility

---

**Single Incision**

**Desara® One**

- Bidirectional adjustability
- Anchor anti-rotation mechanism
- Anchor fully integrated with mesh with high pull-out force
- One handed anchor release mechanism

---
